

Electric water heaters HIT type 5 and HIT 10 open type heaters that are provided to work with low-pressure water mixing battery. The cauldron is made of high quality steel that is galvanized, and also can be stainless steel (INOX) which is physiologically neutral, so water from these boxes can be used in food. Outside of the boiler of 8 and 10 liters can be a sheet of plastic or plastic that offers the perfect design. Thermal insulation is made of modern synthetic materials so that heat losses are reduced to a minimum and allows water to remain long hot. Water heaters of the type hit 5 and HIT 10 can be in two dimensions, upper and lower mounting labeled Open and NM.

3 years warranty on all galvanized water heaters
